www.olon.com
Olon profiles offer the most complete program wrapped with our NEXGEN® laminates. They are available in 15 stock profile styles in exact matches to over 220 North American TFL & HPL colours and perfectly complete our 5 piece door program. For a complete list of available colours, please consult the CPD95 and UPD95 colour lists available on our website at www.olon.com.

Olon's unique trademarked laminate process, NEXGEN®, uses TFL (Melamine) and HPL décor paper saturated with specialty resins that allow the laminate to be very flexible while maintaining the colour as well as the heat & wear resistance of TFL. This formulation allows Olon to provide a pre-finished product with synergistic products to the woodworking industry with the following features:

- Perfect match with no discoloration or fading over time
- Exceeds CARB2 emission norms
- Antimicrobial protection, resistance against bacterial growth on the surface
- Surface performance comparable to TFL & Vertical Grade HPL
- Delamination resistant in high heat environments
- Outperforms vinyl, foils and topcoated papers

Olon has built the accessory moulding program to coordinate with the NEXGEN® 5 Piece door profiles. Shown here are our most popular door styles coordinated with moulding of a similar style.

Please note: By mixing and matching from each collection, you'll create a unique masterpiece.

These 9 profiles are produced weekly and with a low 2 box minimum. See your CPD95 or UPD95 price pages for more information.

These 6 profiles are produced every 2 weeks with a 1500 ft. minimum per profile, 300 ft. per colour/finish. See your CPD94 or UPD94 price pages for more information.
