Olon NEXGEN™ Interior Door Components are pre-finished, allow flexibility in design styles, are extremely easy to assemble and coordinate with our other TFL & HPL NEXGEN™ components in residential and commercial applications.

**Notable Features**

*Perfect Match*
- Uses same decorative paper as TFL & HPL manufacturers
- Crisp print fidelity and clarity of colour with no clouding or overlay
- No discoloration or fading over time
- Matching textures complete the look
- Complete matching program of decorative building solutions.
- They are a perfect match to Olon’s 5 piece door components, accessory mouldings, LINK25 formable laminate and edgebanding.

*Antimicrobial*
- Incorporated into the resin formula for increased resistance
- Formula doesn’t promote the growth of bacteria on the surface

*Heat & Wear Resistant*
- Surface performance comparable to TFL & Vertical Grade HPL
- Delamination resistant in high heat environments
- Outperforms vinyl, foils and topcoated papers

*Meets CARB Phase II standards and FSC Certified upon request.*

**Product Offering**

Olon NEXGEN™ Certified Interior Door Components accommodate a 3/8” particleboard TFL center panel or the material of your choice.

Note: Custom solutions for door frames & jams will be evaluated on a case-by-case scenario.

Laminate Door Skins

Olon NEXGEN™ Laminates for door skins are pre-finished, extremely easy to apply in the factory or on-site and can be used on flush fitting doors or with decorative inlays and mouldings to enhance the design.

Notable Features

Perfect Match
- Uses same decorative paper as TFL & HPL manufacturers
- Crisp print fidelity and clarity of colour with no clouding or overlay with no discoloration or fading over time
- Complete matching program of decorative building solutions.
- They are a perfect match to Olon’s 5 piece door components, accessory mouldings, interior door components and edgebanding.

Antimicrobial
- Incorporated into the resin formula for increased resistance
- Formula doesn’t promote the growth of bacteria on the surface

Heat & Wear Resistant
- Surface performance comparable to TFL & Vertical Grade HPL
- Delamination resistant in high heat environments
- Outperforms vinyl, foils and topcoated papers

Easy Installation
- Cuts easily with sheers, straight edge knife or scissors
- Bondable with most conventional adhesives
- Great for onsite resurfacing or new installations
- Performance measured by NEMA LD3-2005

Meets CARB Phase II standards and FSC Certified upon request.

Product Offering

Choose from Olon NEXGEN™ stock LINK25 formable laminate or a custom thickness and surface performance to meet your specific needs.

Available in custom sheet sizes or continuous rolls. Minimum order of 64 sheets or 5,000 sqft.

Note: Custom solutions for door frames & jams will be evaluated on a case-by-case scenario.
